PROFESSIONAL SUMMARY

Security-first software engineer passionate about people and product. Comfortable developing anywhere along the stack, with experience designing and implementing web and mobile applications, data-intensive pipelines, and cloud infrastructure. Background writing intensive automated tests, attentive to long-term code quality and maintainability. Excellent communicator and user-focused engineer guided by the belief that software is more about people than code.

TECHNICAL SKILLS

Languages	JavaScript, Java, Python, Go, C/C++, Bash, PHP
Database Technologies	SQL, PostgreSQL, MySQL, DynamoDB
Frameworks/Libraries	React, Next.js, NumPy, Pandas
Tools	Linux, Git, AWS, Azure, GCP, Docker, Kubernetes

PROFESSIONAL EXPERIENCE

TZ Medical

Associate Software Engineer

Tualatin, OR

May 2026 - Present

Performed full-stack development for BitRhythm, the EKG data platform used by physicians and technicians to analyze and triage Holter study results. Enhanced a React web application, integrated with a microservice architecture running in Kubernetes, and interacted with data-intensive pipelines connecting MySQL and Google Cloud services.

A-DEC

Software Engineer, Intern

Newberg, OR

January 2025 - December 2025

Worked alongside the cloud and application team for a leading designer and manufacturer of dental equipment. Developed and maintained *A-dec+*, the React-based app that connects dentists to the ecosystem of connected IoT products that enables them to connect and configure their devices, manage IAM, and view real-time analytics.

Designed and built a service to sync Azure B2C user data to PostgreSQL via Microsoft Graph API, enabling easy access for the data team. Automated the process via a Gitlab pipeline to ensure continuous synchronization. Conducted security research and performed audits across multiple projects and dependencies, proactively mitigating risks. Initiated technical debt reduction plan to improve long-term maintainability and security.

EDUCATION

GEORGE FOX UNIVERSITY

Bachelor of Science in Computer Science and Cybersecurity

GPA: 3.92

Newberg, OR

August 2022 - May 2026
